

## YOUR HEALTHCARE TEAM IS ALWAYS YOUR BEST RESOURCE FOR INFORMATION ABOUT YOUR TREATMENT

If you have any questions or concerns about your health or treatment, you should reach out to them. It's important that your healthcare team monitors how you're doing on your treatment journey.

### Your healthcare team wants to hear from you!

There is no need to feel you are bothering them if you call them with questions about your treatment, or about any symptoms you may be experiencing.

### Your healthcare team is there for you, every step of the way

#### Who is on your team?

Remember, you are not alone! Behind you is a dedicated team of healthcare specialists who can help you anytime you need guidance, information, or assistance.

#### Hematologist-Oncologist

Your hematologist-oncologist leads your team. This kind of doctor specializes in diagnosing and treating disorders of the blood and related cancers. They may prescribe medications to treat these conditions. Your hematologist-oncologist will oversee your treatment, monitor your condition, and may work with other medical specialists to help you.

#### Oncology Nurses and Physician Assistants

Your oncology nurses and/or physician assistants are also key to your team. They help manage your symptoms, provide informational resources for you and your family, and coordinate care with other members of the team.

**Your nurses and physician assistants are your allies. They care about you and want to know how you are really doing.**

Other team members may also include:

#### Clinical care coordinators:

- Help you navigate the healthcare system

#### Lab technicians:

- Draw your blood

#### Pathologists:

- Examine your blood and tissue samples through a microscope

#### Other healthcare disciplines:

- Nutritionists, psychologists, or social workers

“ My health care team talked about what to expect and different milestones I could obtain. ”

Sam, SPRYCEL patient

*Individual results may vary.*

# HOW TO GET THE MOST OUT OF WORKING WITH YOUR HEALTHCARE TEAM

There are many things you can do to help make sure that you have a good working relationship with your team.

## ✓ Get more involved in your treatment

The more you learn about your treatment and test results, the more productive your discussions with the team will be.

- Visit [SPRYCEL.com](https://www.sprycel.com) for helpful information and resources available through the SPRYCEL CONNECT program

## ✓ Be open and frank about questions or concerns

Your team wants to provide you with information that can help. So, don't hesitate to ask if you've got any questions.

## ✓ Tell them about all the medicines you take

This includes prescription and over-the-counter medicines, vitamins, antacids, and herbal supplements.

**Make a note of the names and contact information of your team members here.** Use this list as a handy reference in case you need specific information.
